

Georgia Project Firstline

Infection control saves lives, and frontline healthcare workers play a critical role. Please encourage all healthcare workers to complete this [Learning Needs Assessment Survey](#) by September 30.

Georgia Project Firstline (GPFL) is helping healthcare workers understand the 'why' behind infection prevention recommendations and best practices. GPFL's mission is to support the advancement of infection prevention and control practices in the healthcare system. Help us understand your infection prevention and control needs by scanning the QR code to complete the survey. We appreciate your time.

Meet Region B's Georgia Project Firstline IPCEE

Meet Region B's Georgia Project Firstline Infection Prevention and Control Education Expert (IPCEE), Sandy Bozarth. Sandy is the director of infection prevention and control for Northeast Georgia Medical Center. She is an outstanding infection prevention leader who is elevating infection control in Georgia.

Thank you, Sandy, for your dedication to patient safety and for sharing your expertise with all of us.

Congratulations on achieving certification in infection prevention!

"I use education materials for the frontline staff. It is very easy to understand for all the staff members. The toolkits have article to read from CDC. The learning activities are fun and easy to use with staff and make them think about how germs and viruses can spread in the environment."

Claudia Pruett, LPN, LTC-CIP

"Obtaining this certification was not easy, but I am very grateful for both the achievement and the knowledge gained. Project Firstline was an invaluable resource in my preparation, offering high-quality, evidence-based materials, including a weekly class and helpful study presentations that supported my success. "

Joni Phillips, MSNeD, RN, CIC

"The study sessions supported by Project Frontline were highly beneficial for my studying and review. I believe I have learned to utilize the resource effectively to answer questions prior to meetings. Additionally, discussing test-taking strategies and, notably, reviewing the rationales after each question significantly enhanced my understanding of the material."

Maria Conner, BSN, RN, CIC

Take advantage of [CDC's Project Firstline free resources](#). The tools are designed to empower health care workers to think critically about infection control. Connect with your region's [Infection Prevention and Control Education Expert](#) (IPCEE) and learn about Georgia Project Firstline opportunities.
