N-Wellstar Kennestone Hospital	Rebecca Alexander, MSN, CIC, CPPS	rebecca.alexander@wellstar.org
SCH Ped-CHOA	Tanya Taffe, MPH, CIC	tanya.taffe@choa.org

What is Georgia Project Firstline? The Georgia Department of Public Health and the Georgia Hospital Association collaborated to increase infection prevention knowledge in Georgia through our 14 healthcare coalitions and our pediatric Specialty Coordinating Hospital, Children’s Healthcare of Atlanta. Each region engaged an experienced infection preventionist to be a regional resource and provide infection prevention education to their regional partners. These infection prevention and control education experts are reaching across the continuum of healthcare to share resources and promote certification in infection prevention.

Register with GHC911 and learn about Georgia Healthcare Coalitions and Georgia Project Firstline. It’s free and easy.

I am honored to be working with such a great group of outstanding infection preventionists. Please feel free to reach out to me as well for any educational infection prevention and control needs.

Peggy McGee, BSN, RN, CIC
Georgia Project Firstline Infection Prevention and Control Coalition Education Coordinator
